

Sungrano International GmbH

Presentation

Agricultural Innovation

Major supplier of quality pulses worldwide

2026

Sungrano International GmbH

Introduction

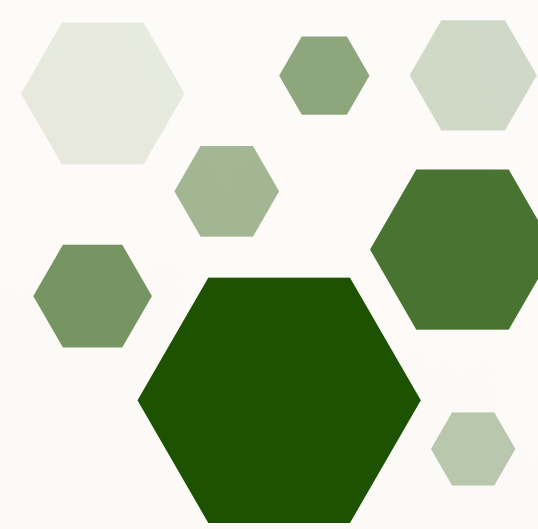

Sungrano International GmbH is an exporter of pulses and a reliable supplier of agricultural products from the Black Sea region to global markets. We are committed to delivering high-quality agricultural commodities sourced directly from trusted producers, ensuring consistency, traceability, and value for our international partners.

With a strong focus on efficiency and long-term cooperation, we connect regional agricultural expertise with the needs of global buyers in the food and feed industries.

Sungrano International GmbH

Oil Seeds

01

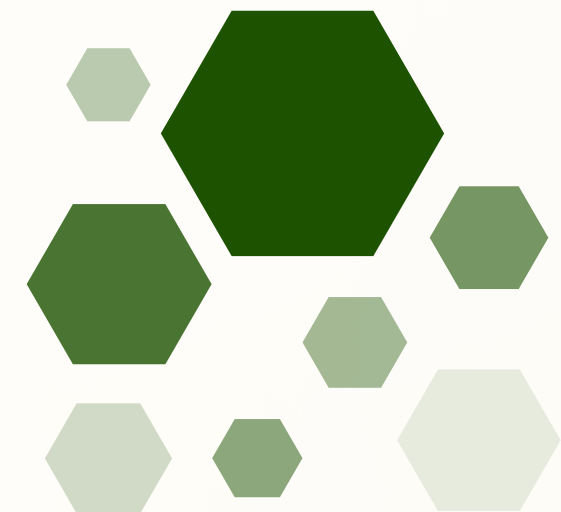

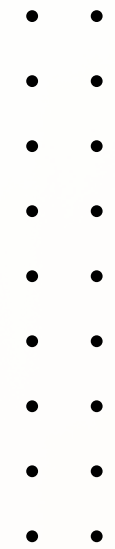

Soybeans

We offer high-quality soybeans of Ukrainian origin, carefully sourced from reliable producers in the Black Sea region. Our soybeans are suitable for food and feed applications and meet international export standards. Depending on customer requirements, we can supply both GMO and non-GMO specifications with consistent quality, moisture control, and proper cleaning and grading. Flexible packaging options and stable year-round supply ensure reliable delivery for our international partners.

02

Sunflower Seeds

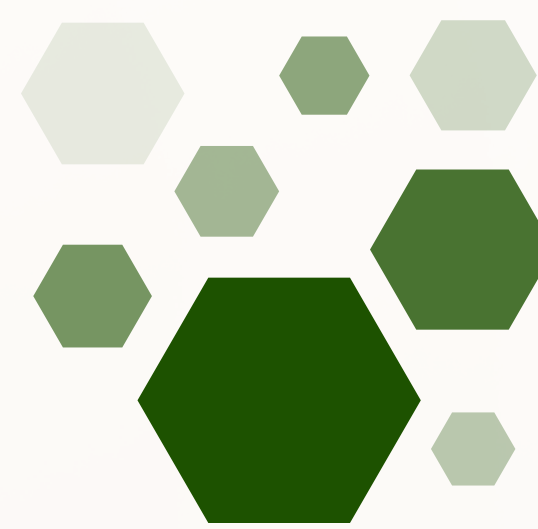

High-quality Ukrainian sunflower seeds intended for industrial processing and export. Carefully cleaned and calibrated to ensure consistent quality and stable oil yield. Suitable for oil production and further processing. Available in bulk packaging or big bags.

Sungrano International GmbH

Oil Seeds

03

Rapeseeds

Rapeseeds (canola seeds) are a high-quality oilseed used for edible oil, margarine, biodiesel production, and animal feed. Supplied by Sungrano International GmbH, the product is carefully selected to ensure consistent quality and high oil yield.

Quality Specs:

Moisture: max. 9%

Foreign matter: max. 2%

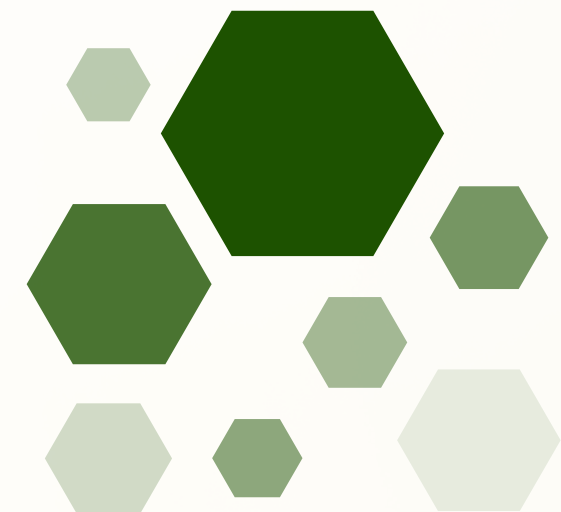

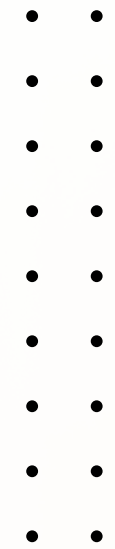

Oil content: min. 43% (as is basis)

Non-GMO

04

Flaxseed

Flaxseed (linseed) is a high-quality oilseed used for industrial processing, edible oil production, and animal feed applications. Supplied by Sungrano International GmbH, the product is carefully selected to ensure consistent quality, purity, and reliable processing performance. Suitable for oil extraction and food industry use, flaxseed is valued for its high oil content and nutritional profile.

Sungrano International GmbH

Grains

01 Wheat

High-quality milling wheat for industrial processing and export. Carefully selected to ensure consistent quality, suitable for flour production and food industry applications. Available in bulk supply.

02 Barley

Feed and malting barley used in brewing, food production, and livestock nutrition. Known for good grain uniformity and processing versatility in industrial applications.

03 Corn Feed

Feed-grade corn (maize) for animal nutrition and starch-based processing industries. Characterized by high energy value and suitability for large-scale industrial supply chains.

04 Oat

High-quality oats intended for food production and processing industries. Widely used in oat flakes, cereals, and health food products due to their natural nutritional value and fiber content. Also suitable for feed applications.

Sungrano International GmbH

Animal Feed

A range of high-quality agricultural by-products and feed materials designed for livestock nutrition. Our products provide essential nutrients, protein, and fiber to support healthy growth and efficient animal production. Suitable for cattle, poultry, and swine feed formulations.

01

Wheat Bran

Wheat bran is a natural byproduct of wheat milling, rich in fiber, vitamins, and minerals. It is widely used in animal feed to support healthy digestion in livestock and poultry, and also applied in food production to increase nutritional value. Suitable for industrial and agricultural use.

02

Sunflower Meal

Sunflower meal is a high-protein by-product obtained after oil extraction from sunflower seeds. It is widely used in animal feed formulations for cattle, poultry, and swine, providing essential nutrients, fiber, and amino acids to support healthy growth and performance. A cost-effective alternative protein source for feed industries.

Sungrano International GmbH

Certificates

Our supplier operates a group of companies with modern processing facilities for cereals and legumes, as well as advanced cleaning and packaging lines for niche agricultural crops. All production sites are certified according to international standards, including HACCP, ISO 9001, ISO 22000, and FSSC 22000, ensuring consistent quality, safety, and reliability across the supply chain.

SGS Inspection

SGS inspection reports can be provided prior to loading, ensuring full transparency and quality verification before shipment.

EU Quality

Our products comply with European quality standards and can be supplied with EUR.1 certificates and export documentation upon request, ensuring reliable quality and international trade compliance.

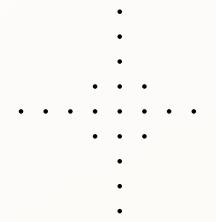

Payment Terms

We offer flexible and competitive payment terms tailored to meet the needs of our international partners and long-term cooperation.

Sungrano International GmbH

Delivery Terms

We offer flexible and reliable logistics solutions for international deliveries. Our products are shipped by truck, sea container, or bulk vessel depending on the destination and order requirements. We work with established transport partners to ensure safe and efficient handling of goods. Shipments are available under different Incoterms, including DAP, DDP, CIF, and others, allowing us to adapt to the specific needs of each customer and market. This flexibility ensures smooth delivery from origin to destination with full logistical support.

Sungrano International GmbH

Thank You

We sincerely thank you for your interest in our product catalogue. We appreciate your time and look forward to building a long-term and successful cooperation with you.
